

Welcome to State of Idaho’s dental plan, administered by Blue Cross of Idaho.

FOCUS ON PREVENTIVE CARE

When visiting a dental provider in your network, the State of Idaho dental plan pays 100% of the maximum allowable charge for preventive care, with no deductible. Preventive services include exams, cleanings, X-rays, and fluoride and sealant treatments for eligible dependents (age limitations apply).

THE IMPORTANCE OF PREVENTIVE CARE

Routine visits to your dentist are just as important as visits to your primary care provider (PCP). Studies show, your oral health affects your total health. Good health should be a priority, and lifelong health habits begin in childhood. Gum disease has been linked to health problems such as heart disease, diabetes and stroke. With the Centers for Disease Control and Prevention (CDC) reporting that almost half of adults have some form of gum disease, good dental health should be a priority.

Routine dental cleanings and good oral care can help cut down on your risk of gum disease and the serious health issues that may come with it.

YOUR DENTAL BENEFITS AT A GLANCE

FIND A PROVIDER

If you go to an in-network provider, your costs will be lower based on the plan design chart below and you will not be responsible for amounts above the maximum allowable charge for any covered services.

To find in-network dental care:

1. Visit **bcidaho.com**.
2. Select **Find a Doctor**.
3. Choose **Dental Preferred Provider Organization (DPPO)** from the list.
4. Follow the prompts to search for the type of care you’re looking for.
5. You can also enter a dentist’s name or practice in the search bar.

The search automatically uses your current location as the default. Select **Current Location** if you’d like to search in a different city.
