The balance in your HSA Investment Account is subject to investment risks, including fluctuations in value and the possible loss of the principal amount invested. Investing through the WealthCare Saver investment platform is subject to the terms and conditions of the Health Savings Account Custodial Agreement and any applicable investment supplement(s). For information regarding underlying investment expenses, earnings, and distributions, see the applicable investment prospectus and other publicly available information.

WealthCare Saver, a dba of Alegeus Technologies, LLC, is a licensed Non-Bank Custodian of HSA cash accounts.

CapFinancial Partners, LLC (“CAPTRUST”) is an investment adviser registered under the Investment Advisers Act of 1940. CAPTRUST acts as investment advisor with respect to the investments available in your HSA. In addition, you may choose to have CAPTRUST manage your HSA account on a discretionary basis.

DriveWealth, LLC, a registered broker dealer and member of [FINRA](#) and [SIPC](#). SOC 2 Type 2, GDPR, CCPA compliant. Registered in all 50 U.S. states.

Welcome

You made a smart choice in selecting a health savings account (HSA)! Now it's time to take advantage of the investment opportunity that comes with your HSA to grow your account and save for your future. We're making it easy for you to get the investment experience that's just right for you, whether you're a new or seasoned investor. Within this guide, you'll learn how to enroll, set up and manage your investments.

HSA investments 101

Planning for healthcare costs in retirement

The average couple can expect to spend \$300,000 on out-of-pocket healthcare costs during retirement, including Medicare premiums, gap coverage, expensive medications, and more.¹ Investing your HSA can help you build a nest egg and ensure you have enough money set aside for the future.²

Once your HSA reaches the required minimum balance, you can begin to build wealth and save for retirement by investing your funds, just like a 401(k). But unlike a 401(k), you **never pay taxes** on earnings or withdrawals for qualified medical expenses! HSA contributions offer greater tax savings than 401(k) contributions and give you the potential to save at a faster rate.

Key things to know before getting started

- **Minimum balance:** You will need to accumulate a minimum balance in your HSA cash account before you are able to invest. Any funds above this threshold can be invested. To see your minimum balance requirement, log in to your HSA portal and click on the 'investments' button within your *HSA account summary*.
- **Transferring funds:** If you have unexpected medical costs, you can transfer your investment funds back into your HSA at any time. There are no fees or penalties for withdrawing money from your investments to pay for qualified medical expenses.
- **Industry-leading solution:** Enjoy an innovative and modern investment experience that provides access to different investment account types, real-time investment account opening and trading, and modern investment tools.
- **Online account management:** You can manage your investments online via your mobile phone, desktop computer, or tablet – from the same place you manage your HSA!
- **Flexible options:** Choose from a variety of investment options that fit your needs, whether you're a new or seasoned investor: [Managed](#), [Self-Directed](#) or [Brokerage](#).
- **Market hours:** Market hours refer to the business time of the US stock market. Investment choices (including opening an account) can only be made during stock market hours which are Monday- Friday, 9:30 AM - 3:55 PM EST. The stock market closes for most federal holidays.

²Investments in securities through the HSA investment account are:
Not FDIC insured | May lose value | No bank guarantee

Opening an investment account

Follow the steps below to open your HSA investment account.

1. Log in to your HSA portal.
2. Expand 'my accounts' from the menu and click 'investments' or navigate to your HSA account summary and click the 'investment' button.

3. Click on the 'start investing' button.

***Note:** you can only proceed with the next steps if you have achieved the minimum required balance in your HSA and the market is open (Monday – Friday, 9:30 a.m. – 3:55 p.m. ET).

 Hi Madison, welcome to your HSA investment experience!

There's no doubt your HSA is a great way to pay for current-year eligible medical expenses, but did you know it can also be used as a long-term investment vehicle? By investing your HSA, you give your money a chance to grow, maximizing opportunities to boost your savings and prepare for the future, including retirement.

Currently, you have \$6,000.00 available to invest.

Opening an investment account is simple. To take full advantage of all the long-term savings opportunities your HSA delivers, click the button below!

Able to invest

Hi Lindsay, welcome to your HSA investment experience!

There's no doubt your HSA is a great way to pay for current-year eligible medical expenses, but did you know it can also be used as a long-term investment vehicle? By investing your HSA, you give your money a chance to grow, maximizing opportunities to boost your savings and prepare for the future, including retirement.

Opening an investment account is simple. Once your HSA balance reaches \$1,001.00, you may choose to invest any HSA cash dollars above this threshold.

Your current balance is \$0.00. Keep saving and once your balance exceeds \$1,001.00, we'll let you know you're eligible to invest.

Unable to invest – minimum threshold not met

Hi Brandon, welcome to your HSA investment experience!

There's no doubt your HSA is a great way to pay for current-year eligible medical expenses, but did you know it can also be used as a long-term investment vehicle? By investing your HSA, you give your money a chance to grow, maximizing opportunities to boost your savings and prepare for the future, including retirement.

Opening an investment account is simple. Once your HSA balance reaches \$1,001.00, you may choose to invest any HSA cash dollars above this threshold.

Your current balance is \$0.00. Keep saving and once your balance exceeds \$1,001.00, we'll let you know you're eligible to invest.

Unable to invest outside of stock market hours

4. Accept the investment account terms and conditions. If you any of the following apply, you will be prompted to disclose this information per federal regulations:

- You are affiliated with a broker/dealer
- You are a shareholder/director of a publicly traded company
- You or an immediate family member is a current or former Politically Exposed Person/Public Official

Disclosures

According to federal regulations, you must disclose the following accordingly.
For most people, none of these will apply.

I am affiliated with or work for a broker/dealer

I am a 10% shareholder or director of a publicly traded company

I am or an immediate family member is a current or former Politically Exposed Person/Public Official

None of these apply (most common)

6. Based on your preferred investment selection, you will be guided through a series of easy steps to either review or self-select funds, enter your investment amount(s) and begin investing.

For more information about the three investment methods, see the ‘how to’ sections below.

How to: Managed account type

What is a Managed account?

The Managed investment path is designed for novice investors who prefer to have our advisor tool automatically select and rebalance investments on an ongoing basis in accordance with their age and/or risk profile. This account type delivers a “do-it-for-me” approach to investing.

Enrolling in a Managed account

If you choose the Managed account type during the investment account opening process, the on-screen prompts guide you through the following steps to complete your enrollment:

1. **Select an amount to invest.** The amount you choose to invest is transferred from your HSA cash account into your HSA investment account after you complete your enrollment.
2. **Fill out a risk questionnaire.** Your answers to the risk questionnaire help the advisor tool determine your risk tolerance and allow it to craft a portfolio for you. You can review the suggested portfolio and either accept as-is or change your answers to the risk questionnaire to receive a different suggested portfolio.

3. **Review the order and open your account.** After clicking the 'invest' button, your investment account is opened and the investment amount you choose is allocated accordingly among the funds in the suggested portfolio.

Managing a Managed account

The Managed account type eliminates most of the work associated with investing your funds. After you accept the suggested portfolio, the advisor tool regularly rebalances your portfolio for you.

The first screenshot, 'Account Funding', displays the user's current HSA cash balance as \$2,892.70 and states that a minimum balance of \$10.00 is required. It shows the amount available to invest as \$2,882.70. The user has selected to invest \$500.00. The second screenshot, 'Risk Questionnaire', asks for age (41-55) and market outlook (Moderately Optimistic). The third screenshot, 'Recommended Portfolio Allocation', shows a total investment of \$500.00 and a table of recommended funds.

Fund Name	Total	Recommended	Current %	Current
Fidelity Mid-Cap Stk	\$500	\$0	0.0%	\$0.00
Fidelity Divd Growth	\$500	\$0	0.0%	\$0.00
Fidelity Mid-Cap Stk	\$500	\$0	0.0%	\$0.00
Fidelity Divd Growth	\$500	\$0	0.0%	\$0.00
Fidelity Mid-Cap Stk	\$500	\$0	0.0%	\$0.00
Fidelity Divd Growth	\$500	\$0	0.0%	\$0.00
Fidelity Mid-Cap Stk	\$500	\$0	0.0%	\$0.00
Fidelity Divd Growth	\$500	\$0	0.0%	\$0.00
Fidelity Mid-Cap Stk	\$500	\$0	0.0%	\$0.00
Fidelity Divd Growth	\$500	\$0	0.0%	\$0.00

Updating your risk questionnaire

To change your answers to the risk questionnaire, click on 'account settings' and select 'update risk questionnaire' at any time during market hours. Review your current answers and adjust your selections as needed. The advisor tool then suggests a portfolio that better suits your needs. When ready to accept the suggested portfolio, simply click 'invest'. Buys and sells are executed accordingly to transition from your old portfolio to your new one.

The 'ACCOUNT SUMMARY' page for an HSA account shows the following key metrics: Investment Balance of \$142.47 (updated 06/24/2022 at 1:17 PM), Total Return of \$0.00 (from 09/30/2021 to 06/24/2022), Last 90 Days of \$0.00 (from 03/26/2022 to 06/24/2022), and Cash Available to Invest of \$285.74. The 'Auto Transfer' feature is currently INACTIVE. A line chart displays the investment balance over time, showing a steady increase from approximately \$139 to \$142.47 as of June 24, 2022. The chart includes time period filters for 1W, 1M, 6M, 1Y, and ALL.

Transferring funds in a Managed account

Follow these steps to move money between your HSA cash account and your HSA investment account.

1. Click 'move money' and select 'Transfer Funds'.
2. Enter the amount you'd like to transfer.
3. Select the account you want to transfer from.
4. Select the account you want to transfer to.
5. Review the transfer request and click 'submit'.

The screenshot shows a 'Transfer Funds' form with the following elements:

- Title:** Transfer Funds
- Instruction:** Move money to and from your investment account.
- Step 2:** A text input field labeled 'Enter the amount you would like to transfer.' containing the value '50.00'. A red circle with the number '2' is overlaid on the input field.
- Checkbox:** An unchecked checkbox with the text 'Would you like to transfer your entire investment balance?'.
- Step 3:** A dropdown menu labeled 'From' with the selected account 'WealthCare Saver HSA - WCSHSA' and a balance of '\$2,794.49'. A red circle with the number '3' is overlaid on the dropdown.
- Step 4:** A dropdown menu labeled 'To' with the selected account 'Investment Account' and a balance of '\$500.06'. A red circle with the number '4' is overlaid on the dropdown.
- Arrow:** A blue arrow pointing from the 'From' dropdown to the 'To' dropdown.
- Buttons:** A blue 'REVIEW' button and a smaller 'Close Investment Account' link below it.

If you're transferring money from your HSA cash account into your HSA investment account, buys are executed according to your portfolio allocations and may take up to two business days.

If you're transferring money from your HSA investment account into your HSA cash account, sells are executed according to your portfolio allocations and the money settles into your HSA cash account within two business days.

Automated Investment Transfers

You can use Automated Investment Transfers to have money moved from your HSA cash account into your HSA investment account, without lifting a finger.

Start by determining the balance you'd like to maintain in your HSA cash account and the minimum amount you'd like transferred. When your HSA cash balance reaches the amount set, the exceeding balance will be incrementally transferred into your HSA investment account.

Transfers occur at the close of each day. Money is only moved when your minimum HSA cash balance exceeds the amount you've set, **and** the excess money is equal to the minimum transfer amount you've decided on.

Follow these steps to setup Automated Investment Transfers:

1. Click 'Move Money' and select 'Automated Investment Transfers'
2. Review how Automated Investment Transfers work. Click 'proceed'
3. Enter the amount you'd like to maintain in your HSA account
4. Enter the minimum amount you'd like moved for reoccurring transfers
5. Mark the check box to indicate that you understand the Automated Transfer tool
6. Click 'save'

The screenshot shows a web interface for setting up Automated Investment Transfers. At the top, there is a navigation bar with links for ACCOUNT SUMMARY, TRANSACTIONS, MOVE MONEY (highlighted with a red dashed box), DOCUMENTS, and ACCOUNT SETTINGS. A button labeled HSA ACCOUNT is in the top right corner. The main heading is "Automated Investment Transfer". Below this, there are two input fields. The first is labeled "3" and asks "What is the amount you want maintained in your HSA account?" with a note "The amount should be more or equal to \$500.00". The second is labeled "4" and asks "What is the minimum amount you would like to set for the reoccurring transfer?" with a note "Minimum auto transfer amount should be more or equal to \$1.00". Below these fields is a checkbox with the text: "* I understand that once my HSA account reaches or exceeds \$0.00, we will automatically transfer amounts above to your investment account. This transfer will be performed at most once a day based on your end of day balance." Below the checkbox is the text "Click Save to accept these settings." At the bottom, there are two buttons: "SAVE" and "Cancel".

How to: Self-Directed account type

What is a Self-Directed account?

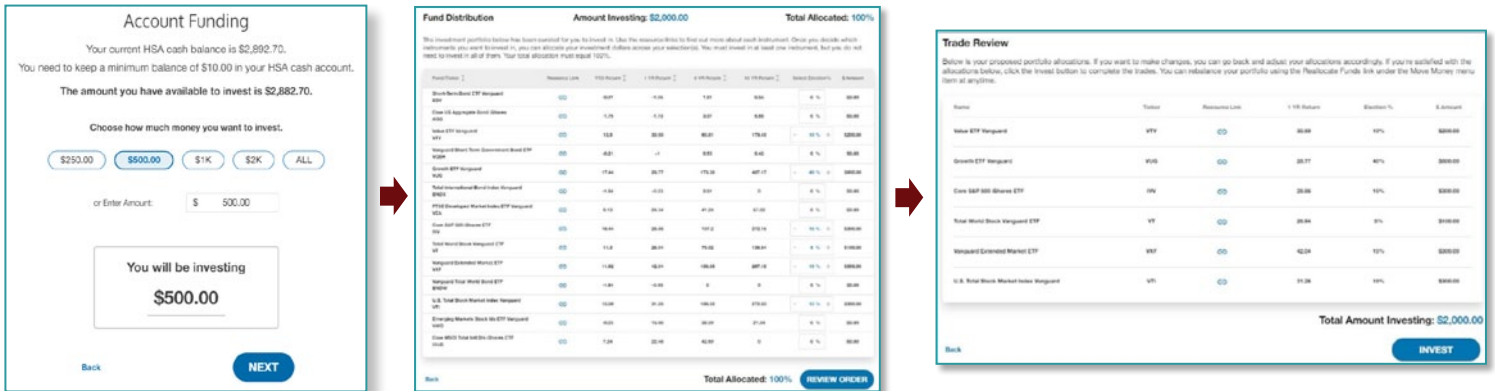

The Self-Directed investment path was designed for intermediate investors who have the desire to self-select from a menu of monitored investment options covering multiple asset classes to diversify their portfolio, and then rebalance their portfolio manually. This account type provides a balance between do-it-for-me and DIY approaches to investing.

Enrolling in a Self-Directed account

If you choose the Self-Directed account type during the investment account opening process, the on-screen prompts guide you through the following steps to complete your enrollment:

1. **Select an amount to invest.** The amount you choose to invest is transferred from your HSA cash account into your HSA investment account after you complete your enrollment.
2. **Choose your funds.** Select from a curated fund lineup – be sure to use the resource links next to each fund for additional details and research as you make your selections.
3. **Allocate your money.** Determine how you would like to allocate your money among the funds, by percentage. The total percentage must equal 100%.

4. **Review your selections and open your account.** After clicking the 'invest' button, your investment account is opened and the amount you entered is invested according to the allocations you selected.

Managing a Self-Directed account

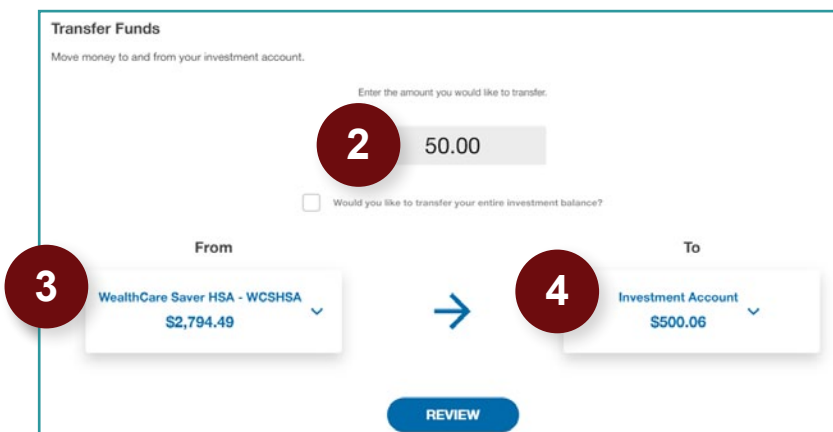

Unlike the Managed account type, the Self-Directed account type is not automatically rebalanced for you. If you would like to rebalance your portfolio, you may do so at any time within market hours by following these steps:

1. Click 'move money' and then 'reallocate funds'.
2. You can increase or decrease your current election % but your total allocations must equal 100%.
3. When satisfied with your allocations, click 'invest'. Buys and sells are executed accordingly to transition from your old portfolio to your new one.

Transferring funds in a Self-Directed account

Follow these steps to move money between your HSA cash account and your HSA investment account.

1. Click 'move money' and then 'transfer funds'.
2. Enter the amount you'd like to transfer.
3. Select the account you want to transfer from.
4. Select the account you want to transfer to.
5. Review the transfer request and click 'submit'.

If you're transferring money from your HSA cash account into your HSA investment account, the money transfers in real time and is automatically used to buy funds according to your portfolio allocations.

If you're transferring money from your HSA investment account into your HSA cash account, sells are executed according to your portfolio allocations and the money settles into your HSA cash account within two business days.

Automated Investment Transfers

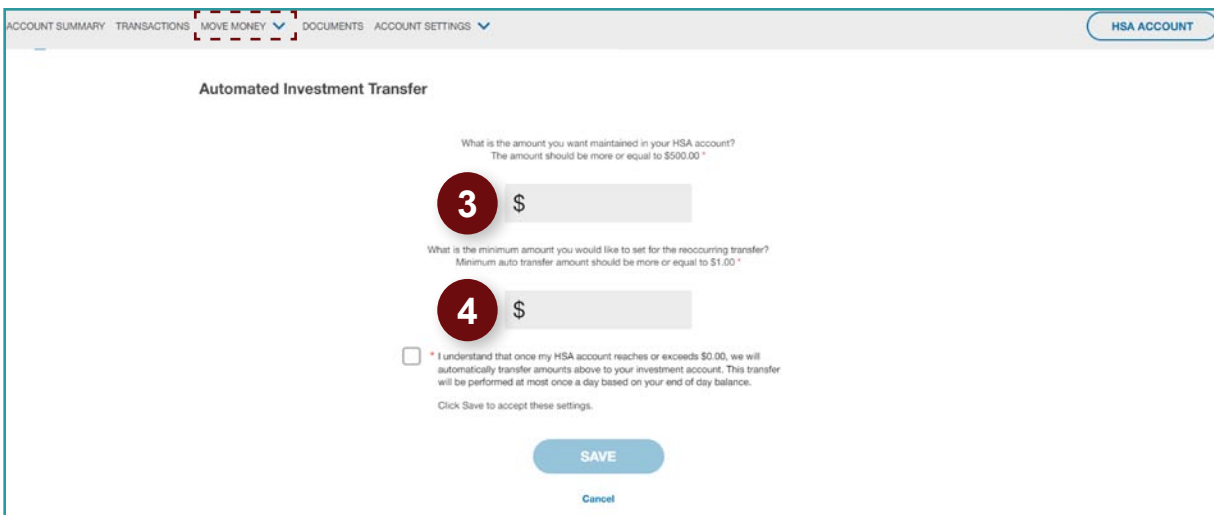

Self-Directed accounts can use the Automated Investment Transfer tool to have money moved from an HSA cash account into an HSA investment account.

First, determine the balance you'd like to maintain in your HSA cash account and the minimum amount you'd like transferred. When your HSA cash balance reaches the amount set, the exceeding balance will be incrementally transferred into your HSA investment account.

Transfers occur at the close of each day. Money is only moved when your minimum HSA cash balance exceeds the amount you've set, **and** the excess money is equal to the minimum transfer amount you've decided on.

Follow these steps to setup Automated Investment Transfers:

1. Click 'Move Money' and select 'Automated Investment Transfers'
2. Review how Automated Investment Transfers work. Click 'proceed'
3. Enter the amount you'd like to maintain in your HSA account
4. Enter the minimum amount you'd like moved for reoccurring transfers
5. Mark the check box to indicate that you understand the Automated Transfer tool
6. Click 'save'

The screenshot shows the 'Automated Investment Transfer' setup interface within an HSA account. The navigation bar at the top includes 'ACCOUNT SUMMARY', 'TRANSACTIONS', 'MOVE MONEY' (highlighted with a red dashed box), 'DOCUMENTS', and 'ACCOUNT SETTINGS'. The main content area is titled 'Automated Investment Transfer' and contains the following elements:

- A question: 'What is the amount you want maintained in your HSA account?' with a sub-note: 'The amount should be more or equal to \$500.00 *'. Below this is a red circle with the number '3' and a text input field with a '\$' symbol.
- A second question: 'What is the minimum amount you would like to set for the reoccurring transfer?' with a sub-note: 'Minimum auto transfer amount should be more or equal to \$1.00 *'. Below this is a red circle with the number '4' and a text input field with a '\$' symbol.
- An unchecked checkbox with the text: '* I understand that once my HSA account reaches or exceeds \$0.00, we will automatically transfer amounts above to your investment account. This transfer will be performed at most once a day based on your end of day balance.'
- A note: 'Click Save to accept these settings.'
- A blue 'SAVE' button and a smaller 'Cancel' button below it.

How to: Brokerage account type

What is a Brokerage account?

The Brokerage investment path was designed for adept investors who desire to perform advanced research and trading across hundreds of individual stocks and exchange-traded funds (ETFs). This account type offers a hands-on, DIY approach to investing.

Enrolling in a Brokerage account

If you choose the Brokerage account type during the investment account opening process, the on-screen prompts guide you through the following steps to complete your enrollment:

1. After choosing the Brokerage account type, you are directed to the Brokerage account confirmation screen.
2. Click 'submit' to automatically open your investment account.
3. Search for investment instruments within the lists of popular stocks and popular ETFs, or by using the search feature.
4. When you select a stock or ETF, you can see additional information about the instrument, including performance details.
5. Enter the amount in dollars you want to buy – you can buy either full or fractional shares.

***Note:** The dollars for buys and sells move back and forth from your HSA cash account accordingly without a sweep account; you don't need to 'fund' your Brokerage account before buying instruments.

6. Review the order and choose to 'edit' or 'buy'.

The screenshot shows a brokerage account dashboard. At the top, it says "Congratulations... let's get started investing!" and "The amount you have available to invest is \$6,000.00". Below this are two sections: "Frequently Traded Stocks" and "Frequently Traded ETFs". A callout window for "Apple, Inc. AAPL" is open, showing a price of \$165.70 and a market value of \$98.09. The callout includes a line chart, investment details, and a "SELL" button. Red circles with numbers 3, 4, 5, and 6 highlight key steps: 3 points to the stock selection area, 4 points to the Apple stock details, 5 points to the "Est Amount" input field, and 6 points to the "SELL" button.

Managing a Brokerage account

How you choose to build and maintain your portfolio is solely up to you. You can enter the investment experience at any time, and you can buy or sell during market hours.

Follow these steps to sell part, or all, of your holdings in an investment instrument:

1. Select the instrument from your dashboard or use the search tool to find it.
2. Click the arrow to select 'buy' or 'sell'.
3. Enter in dollars how much you want to sell – you can sell either full or fractional shares.
4. Review the order and choose 'edit' or 'sell'

Transferring funds in a Brokerage account

Unlike Managed and Self-Directed, there is no true 'transfer' of funds in a Brokerage account. If you want to move money from your HSA cash account to your HSA investment account, you must buy stocks or EFTs. If you want to move money from your HSA investment account to your HSA cash account, you must sell investment instrument(s).

The money movement for buys happens in real time. The money from sells settles into your HSA cash account within two business days.

To transfer all your investment holdings back into your HSA cash account and close your investment account, see the [switching or closing accounts](#) section of this guide.

Automated Investment Transfers

The Automated Investment Transfer tool can be used with brokerage accounts to purchase stocks and ETFs.

When you enroll in Automated Investment Transfers with a brokerage account, you must decide which stocks/ETFs will be purchased and designate a percentage of the auto transfer sum to each buy. When the auto transfer is made, the transferred amount will be applied to the selected buys according to the set percentages. For example, if your automated transfer is set to \$200, and you designate 50% of the transfer to Apple stock and 50% to GE stock, the transfer results in a purchase of \$100 of Apple stock and \$100 of GE stock.

To get started, determine the minimum HSA cash balance you'd like to maintain, and the minimum dollar amount you'd like to move with each transfer. Money is only transferred when your minimum HSA cash balance has been met **and** the excess money is equal to your minimum transfer amount.

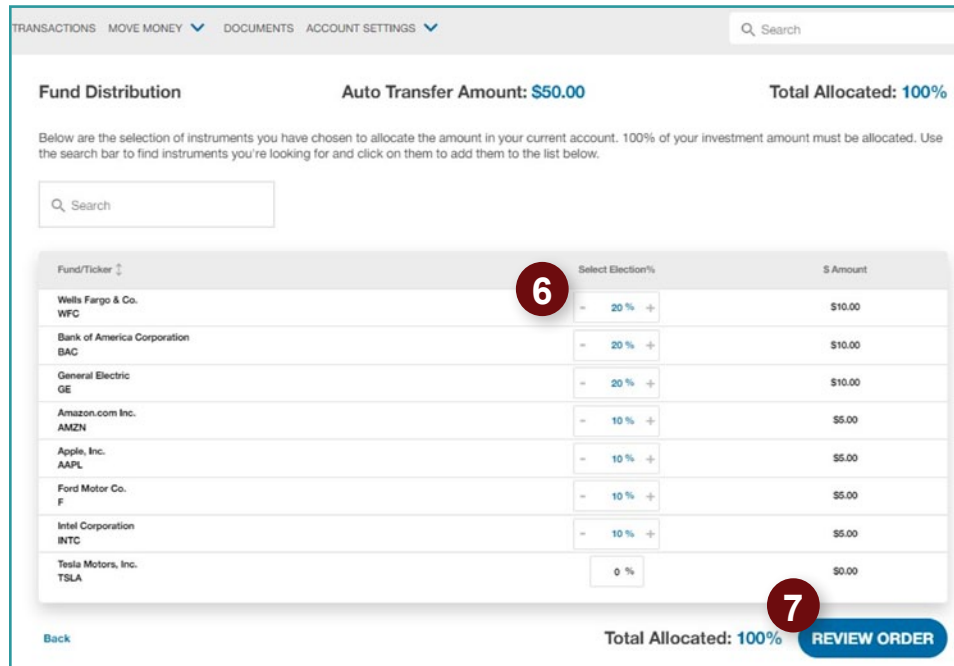

Automated transfers occur daily and purchases are made at the price of the stock/ETF at the point in time when the transfer occurs.

Follow these steps to setup Automated Investment Transfers with a Brokerage account:

1. Click 'Move Money' and select 'Automated Investment Transfers'
2. Review how Automated Investment Transfers work. Click 'proceed'
3. Enter the amount you'd like to maintain in your HSA account
4. Enter the minimum amount you'd like moved for recurring transfers
5. Mark the check box to indicate that you understand the Automated Transfer tool and click 'save'

The screenshot shows a web application interface for setting up Automated Investment Transfers. At the top, there is a navigation bar with tabs: ACCOUNT SUMMARY, TRANSACTIONS, MOVE MONEY (highlighted with a dashed red box), DOCUMENTS, and ACCOUNT SETTINGS. A blue button labeled 'HSA ACCOUNT' is in the top right corner. The main heading is 'Automated Investment Transfer'. Below this, there are two input fields. The first is labeled '3' and asks 'What is the amount you want maintained in your HSA account?' with a note 'The amount should be more or equal to \$500.00 *'. The second is labeled '4' and asks 'What is the minimum amount you would like to set for the recurring transfer?' with a note 'Minimum auto transfer amount should be more or equal to \$1.00 *'. Below these fields is a checkbox with the text: '* I understand that once my HSA account reaches or exceeds \$0.00, we will automatically transfer amounts above to your investment account. This transfer will be performed at most once a day based on your end of day balance.' Below the checkbox is the text 'Click Save to accept these settings.' At the bottom, there are two buttons: 'SAVE' (blue) and 'Cancel' (small, grey).

- Designate what percentage of each transfer should be applied to the stocks/ETFs available in your portfolio. The total allocation must equal 100%
Tip: Use the search bar to add stocks to your portfolio.
- Click 'review order' to finalize your auto transfer preferences on the trade review page

- Click 'save' on the screen that follows

Note: Automatic Investment Transfers occur daily. Each night, your account balances are evaluated for eligible transfers, based on the thresholds you set, and transfers are completed at the next market open.

Maximizing Your HSA investment account

Account statements on demand

You can view your investment statements at any time by selecting 'documents', then expanding the 'monthly statements' to choose which statement you want to view.

Tools and education

You have access to a variety of educational tools and resources designed to help you better understand the benefits of investing your HSA funds as well as provide information about the various investment options available to you.

Simply log in to your HSA portal, navigate to your HSA account summary and click on the 'learn more about investments' link.

Switching or closing accounts

Keeping trade confirmations

Once you close an investment account you are unable to access it again. If there is anything you want to save, such as your transaction history or trade confirmations, make sure it is saved prior to closing your investment account.

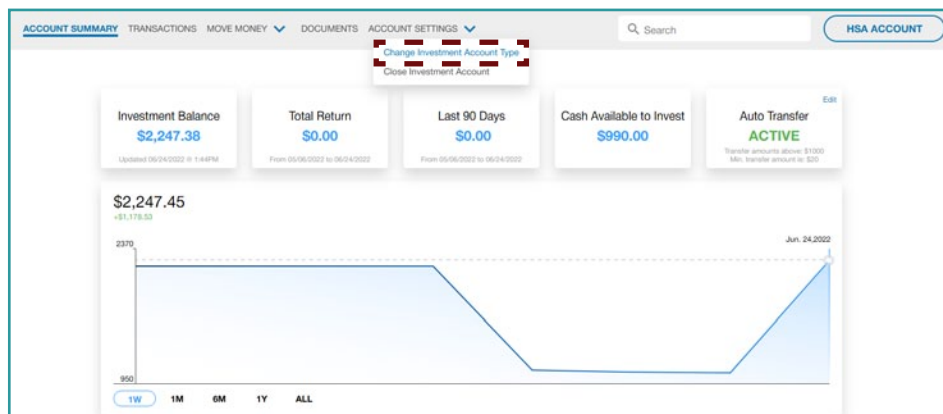

In the Brokerage account type, selling your investments before closing your investment account isn't required. Simply follow the instructions in the [closing your account](#) section to automatically sell all your holdings and close your investment account. However, if you want to keep your trade confirmations for your records, you may want to sell your investments before closing your investment account.

Switching account types

! **Important:** Switching your investment account type closes your current account. The account closure is effective immediately, which means you will not be able to cancel this request. When following the steps below, it is important to note that upon submitting your request, you will not have access to the account including documents and disclosures.

To switch account types, follow these steps:

1. Click 'account settings'
2. Click 'change investment account type'
3. Click 'submit'
4. Complete the steps listed for creating a new account type; [Managed](#), [Self-Directed](#) or [Brokerage](#).

Note: When switching from a Managed account to a Self-Directed or Brokerage account, your money will have to settle in your HSA before it is able to be used. While this process is occurring, you will be able to immediately create a new account if you have the minimum amount required to invest in your HSA account independent of the amount waiting to be settled.

Closing your account

You must zero out your investment balance before you can close your investment account.

To close a Managed account type:

1. Click the 'move money' menu item.
2. Click the 'close investment account' link at the bottom of the screen.
3. Click 'submit' on the next screen.

To close a Self-Directed account type:

1. Click the 'move money' menu item then click 'transfer funds'.
2. Click the 'close investment account' link at the bottom of the screen.
3. Click 'submit' on the next screen.

To close your Brokerage investment account:

1. Click 'account settings'.
2. Click 'close investment account'.
3. Click 'submit'.

Regardless of which investment account type you have, once you close your investment account, you can no longer access it. The investment account is immediately closed in real time, which means you are unable to cancel the investment account closure request.

The image displays three screenshots from a financial platform's user interface. The first screenshot shows the 'ACCOUNT SUMMARY' page with a 'Close Investment Account' link highlighted in a red dashed box. The second screenshot shows the 'Transfer Funds' page with a 'Close Investment Account' link highlighted in a red dashed box. The third screenshot is a confirmation dialog box titled 'Do you want to CLOSE your investment account?' with a 'SUBMIT' button and a 'Cancel' link.
